This is the general overview of the test for WEEK 3 , as you can see there are no test performed for the generators as these were prebuilt .

DataStorage

Element	Missed Instructions	Cov.	Missed Branches	Cov.	Missed	Cxty	Missed	Lines	Missed	Methods
main(String[])	<div><div></div></div>	0%	<div><div></div></div>	0%	3	3	16	16	1	1
getAllPatients()	<div><div></div></div>	0%	<div><div></div></div>	n/a	1	1	1	1	1	1
addPatientData(int, double, String, long)	<div><div></div></div>	100%	<div><div></div></div>	100%	0	2	0	6	0	1
getRecords(int, long, long)	<div><div></div></div>	100%	<div><div></div></div>	100%	0	2	0	5	0	1
DataStorage()	<div><div></div></div>	100%	<div><div></div></div>	n/a	0	1	0	3	0	1
Total	77 of 133	42%	4 of 8	50%	4	9	17	31	2	5

Created with JaCoCo 0.8.7

As you can see, I didn't test the Main of the DataStorage Class, this is because it uses all the methods that have in fact been tested , thus it would be redundant to test for something that we already know is working.

Patient

Element	Missed Instructions	Cov.	Missed Branches	Cov.	Missed	Cxty	Missed	Lines	Missed	Methods
getRecords(long, long)	<div><div></div></div>	100%	<div><div></div></div>	66%	2	4	0	6	0	1

Patient(int)	<div><div></div></div>	100%		n/a	0	1	0	4	0	1
getRecords()	<div><div></div></div>	100%		n/a	0	1	0	1	0	1
Total	0 of 67	100%	2 of 6	66%	2	7	0	14	0	4

Created with JaCoCo 0.8.7

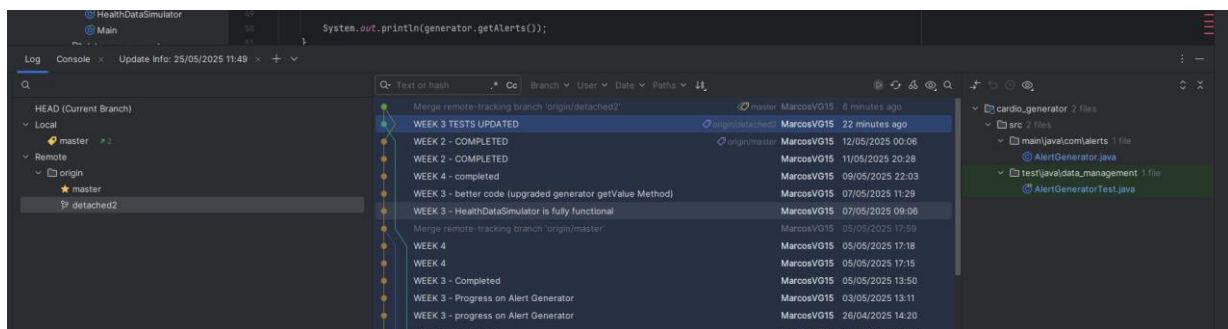

Patient has been indirectly tested for as it contains all the information we want to analyse

This is the overview of all the tests. As you can see I haven't tested for the evaluate Data , As this method contains all the other methods, and similarly to the Data Storage , it would be redundant to test this method too.

I have had some complications as my initial tests as they didn't use assert function to analyse the code, so I created another branch that does contain this, which is why you can see a detached branch. I believe that leaving as another branch is the best way to preserve this change as you can access the branch and see my code easily and fully functionally, and secondly, I don't know where the best location would be to branch the code without having to refactor a lot of the code.
